Our Efforts Based on Social Responsibility

Environmental Efforts

Reduction of Environmental Load Through Business

Many of our products use materials derived from exhaustible resources. By planning, manufacturing and selling as a product that can be used repeatedly and for a long time, we believe that it will lead to effective utilization of limited resources and reduction of environmental load.

- -We acquired ISO14001 certification in 2005. We strive to improve management structures and reduce environmental impacts, such as re-use of shredded waste cloth material.
- -Development of reusable infection prevention products
- -Considering not only ourselves but hospitals, we developed new product "COMPELPACK", which shifts "Re-use" from "Disposable", and has sold it. "COMPELPACK" is the surgical wear which enables hospital to reduce waste and be more economical.
- -Introducing HV vehicles to commercial vehicles
- -Installed a solar power generation panel on the roof of the head office building and at the west Japan logistics center

Addressing Climate Change Issues

As a climate change disclosure based on TCFD, we plan to implement a formulation process for scenario analysis, such as mitigation and adaptation efforts for climate change problems, identification of opportunities and risks, etc.

II Market Environment

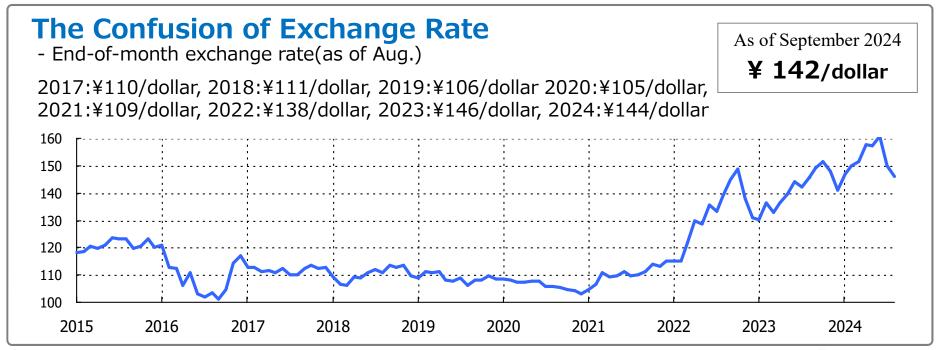

Topics

Challenging Business Environment in the Market

- Increased costs due to inflation are putting pressure on the management of medical and long-term care institutions.
- Reduced revenue caused by the end of COVID-19 subsidies and a decrease in patient visits.
- Although there has been a positive revision in the base medical and long-term care service fees, much of it is allocated to labor costs, resulting in minimal actual contribution to business operations.

Rising Cost Pressures in Production

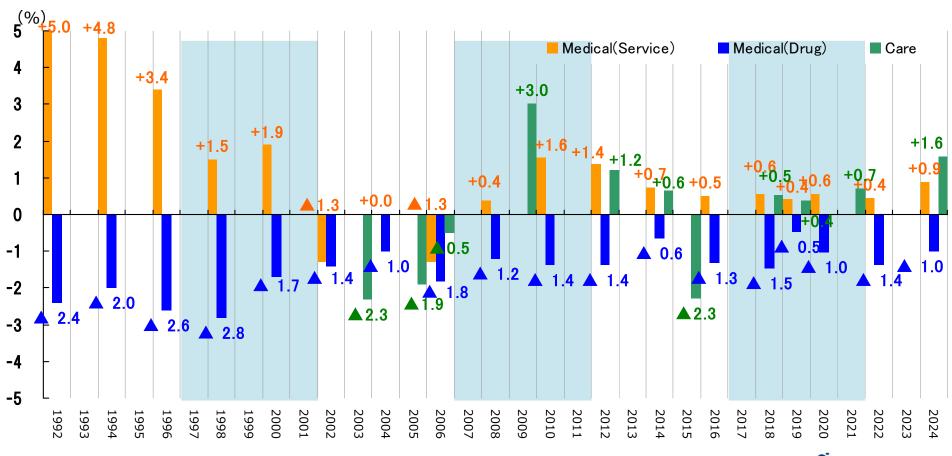

- The continued surge in raw material costs due to the rising prices of various commodities.
- Ongoing increases in labor costs.
- The rapid depreciation of the yen led to a steep rise in manufacturing costs.

Revisions to Medical Treatment and Care Service Fees

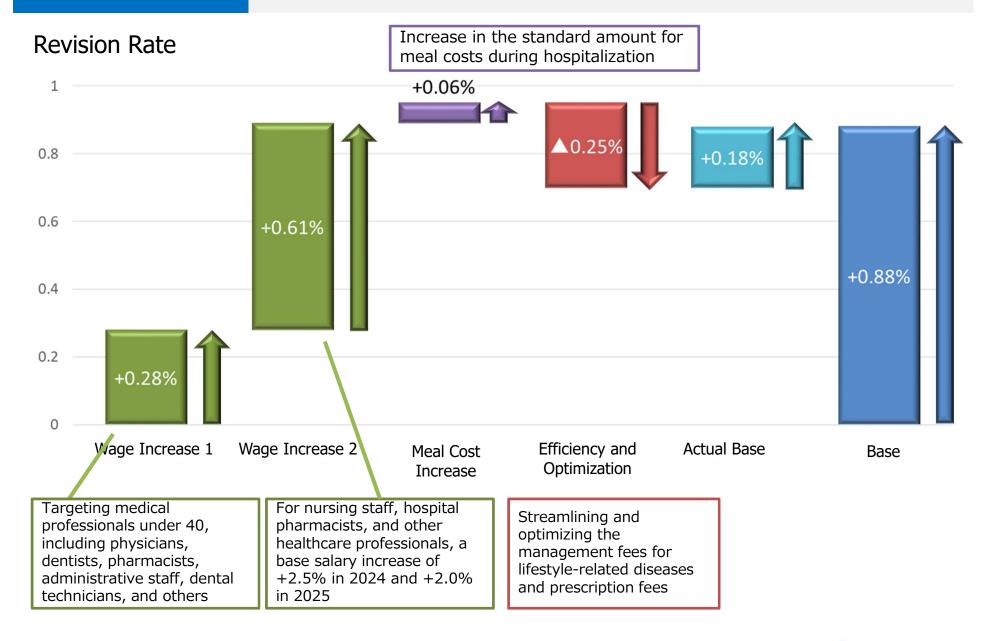

Double Revision of Medical and Care Reimbursements Planned for 2024

- -Medical treatment fees: Service: +0.88% (effective June 2024), Drug price: -1.00% (effective April 2024) (+1.59%)
- -Nursing care fees: +1.59% (effective April 2024), (The medical-related sections will be effective June 2024)

FY2024(Results) FY2025(Forecast)

In addition to the impact of inflation from the previous fiscal year, the market has remained in a very challenging business environment due to the abolition of COVID-19 subsidies and a decline in the number of patients. Although both medical and long-term care service fees saw positive revisions, much of the increase was allocated to labor costs, resulting in minimal actual positive contribution.

Our company's sales in the first half decreased by 6.8%, while the second half saw a smaller decline of 2.5%, but a full recovery was not achieved. The core market saw a 6.4% reduction in revenue. Price negotiations for renewal projects in the low-price market took time, causing a large number of deals to be postponed to the next fiscal year. On the other hand, the peripheral market saw a recovery trend in patient wear during the second half, resulting in a performance almost on par with the previous year for the full fiscal year. Meanwhile, although the overseas market remains small in terms of sales scale, it grew steadily with a 12.5% increase.

No favorable factors have been identified that would contribute to an improvement in the business environment, and it is expected that the market will continue to experience challenging conditions.

In the core market, we have forecasts for delayed renewal projects from the previous fiscal year and large-scale projects. By introducing new strategic products for the low-price market, which faced difficulties with renewals last year, and preventing further delays, we are expecting a 5.2% increase in revenue.

In the peripheral market, in addition to expanding sales of new patient wear products, there is an expectation of replenishment demand for existing products. We are also planning a 9.8% increase by promoting COMPELPACK surgical wear and leasing. The overseas market is expected to continue performing well with a 13.8% increase.

Overall, the company is aiming for a total revenue of 17.5 billion yen, representing a 6.6% increase.

Amid a challenging market environment, a large number of functional product renewal Core Market projects were delayed to FY2025 due to price negotiation delays. Renewals for high-functionality products proceeded smoothly and were almost on par with the previous year. Although the challenging market environment is expected to continue, sales are forecasted to recover due to the confirmed delivery of large projects in FY2025, in addition to the delayed projects from FY2024.

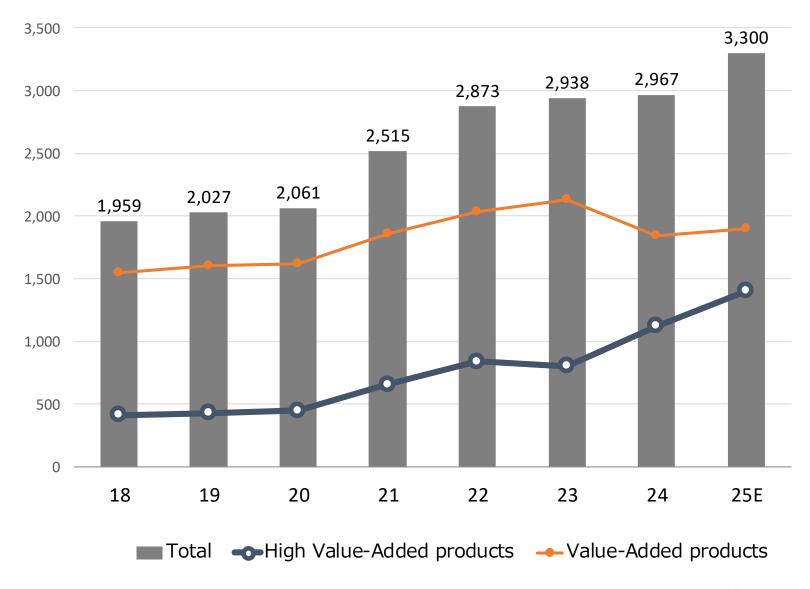

Peripheral Market

[Patient]: Although sales recovered in the second half of FY2024, the full-year result showed only a slight increase. In FY2025, continuous growth is expected for High Value-added product groups, along with a recovery in replenishment demand for Value-added products.

[Surgery]: A revenue increase is planned through continued growth in sales of COMPELPACK and the leasing of surgical wear.

Overseas Market: Aiming to establish a business model through the spread of laundry outsourcing and direct sales via e-commerce.

High-End products: Although there was a significant revenue decline due to the market being heavily impacted by environmental changes, the annual rollout of the new brand "MACKINTOSH PHILOSOPHY" is expected to revitalize the stagnant market through increased market penetration.

High Value-Added products: We plan to secure orders for large-scale renewal projects, primarily centered around the highly functional product group of the successful "Earth Song" series.

Value-Added products: By introducing new strategic low-price products produced entirely overseas, we plan to achieve the renewal of delayed and scheduled projects.
